

ANTONELLA TEZZA

Lead Designer

8 THINGS YOU NEED TO KNOW ABOUT ME

01

I am a designer, with experience in a variety of disciplines, driven by enthusiasm, curiosity, and experience. I'm constantly learning and experiencing new things.

02

In my +15 years' experience, I have created +140 projects as web and native mobile applications and created +25 brand identities.

03

I base my design on UX design principles. Research and a deeper understanding of the users will make stick them on the websites and applications

04

Complexity makes me happy. I explore multifarious solutions and apply them to your requirements.

05

I lead by example, helping other designers to create better products.

06

Alone is boring. Working with talented people motivates me to learn and to become a better designer.

07

I believe in collaborative decision-making, with other stakeholders involved in the rolling out of a project.

08

Whenever I can, I try to use "agile methodology" in my team
